Education

Thakur College of Engineering and Technology

Bachelor of Engineering, Information Technology Engineering, CGPA - **9.60(6th sem)**

Aug. 2019 – Present

Mumbai, India

Maharashtra State Board Higher Secondary Education

XII Science, Vocational course in Electronics - **72.48%**

Aug. 2017 – May 2019

Mumbai, India

Maharashtra State Board Higher Secondary Education

X - **82.80%**

March 2016 – May 2017

Mumbai, India

Experience

Software Developer (Freelancer)

Outworld Concepts

Jun 2022 – Present

Remote

- Fabricated a frontend in **NextJS** and made the company **website** from scratch.
- I was also in charge of **integrating** the APIs to front-end components I had created as well as created by my teammates in **React Native**.
- Also wrote backend using **prisma**, **trpc** and **cockroach DB**.

Full Stack Developer Intern

Platform Integration Software Technologies

Apr 2022 – Jun 2022

Remote

- Fabricated a frontend in **ReactJS** and **Ant design** for a creation platform built on **MERN** stack
- I created the **functionality** and implemented it from scratch, in addition to writing the **backend APIs**.
- I was also in charge of **integrating** the APIs to front-end components I had created for the application.

Full Stack Trainee

Prodio DesignWorks

Dec 2021 – Jan 2022

Mumbai, India

- Tiny defects, such as design flaws, were fixed for the front-end section.
- Attend stand-in meetings to gain insight into client demands and how those demands are translated into features.
- I performed quality assurance work to identify the types of bugs created by developers, studied prototyping, and created a prototype.

Projects

Simply Register / *Mongo, Express, React, NodeJS*

- It is a software that automates and develops an effective way to maintain facility access and exit.
- The user simply scans the generated QR code to log entries and exits.
- The admin has access to this data, which allows them to quickly find any entry as well as provide several simple-to-use features.

Chat Application / *Mongo, Express, React, NodeJS*

- WhatsApp-inspired chat application with all the **typical chat app** features.
- **PusherJS-based end-to-end user chat functionality**.

E-Commerce Website / *Mongo, Express, React, NodeJS*

- A website like Amazon that uses cutting-edge technologies like **RestApi** and **React-Redux**
- It contains all the standard features, also features like a payment **gateway** and an **admin** panel.

Skills

Languages: JavaScript, Python, NOSQL, SQL, HTML/CSS, PHP.

Frameworks & Libraries: React, Node.js, Express, Material-UI, Bootstrap.

Tools and Environment: AWS, Ubuntu, Git, Bash, Visual Studio Code Android Studio, Selenium IDE Mongo DB, MySQL.

Certificate

- Introduction to Web Development (Coursera) Certificate.
- Programming Fundamentals (Coursera) Certificate.
- Introduction to Structured Query Language (SQL) (Coursera) Certificate.
- Introduction to Software Testing (Coursera) Certificate.
- Building Web Applications in PHP (Coursera) Certificate.

Hobbies

- Reading.
